## Reminders:

**Stay Covid Safe- stay home if feeling ill.**

Please remember if your child comes in contact with a positive case of Covid they must stay home, contact the Health Department for assistance.

**STAR testing #1:**

STAR assessment is a progress monitoring computer base program we use to monitor student progress. We will implement this computer based test three time per year. Beginning, Middle and End of year. The data we receive from this assessment helps us to identify this students that need additional instruction in Math, Reading and Science. It also helps us to determine those students that may benefit from advanced placement and/or accelerated programs.

## Construction Continues

The portable classrooms are operating well. Teachers have done a great job creating a very inviting and comfortable learning environment. Abatement continues in the old campus buildings. Expect demolition to begin in September.

## School Counselor's Spotlight

Need help with your schedule, organization, or developing better habits? Confused about how to handle a situation with your friends? Need help and problem solving ideas or a listening ear?

Come see the School Counselor Mrs. Klessens. Meet with the school counselor before school begins, during elective periods, or at lunch. Ask to see Mrs. Klessens in the front office and leave a note she is not available at the time.

Parents call or email if you think that your student would benefit from seeing the school counselor or needs some added support. School counselors can support all students in academic achievement and goal setting, social or emotional issues, making helpful referrals, advocating for students, and collaborating with families and teachers for student success.
